

FLOOR CARE **FLOOR FINISHING PROCEDURE**

Products

Sprayon® Finish or Sprayon Sealer

Equipment:

“Wet floor” signs

Floor machine (optional)

Mop bucket and wringer trash liner

Clean finishing or rayon mop head with handle

Dust mop

Procedure:

1. Place “Wet Floor” signs throughout area to be finished/sealed (safety first).
2. Line the mop bucket with a trash liner to avoid contamination.
3. Pour in finish or sealer. Pour only what you intend to use.
4. Dip pre-soaked rayon mop head into the finish or sealer. Press out excess, do not use wringer.
5. Outline area to be finished/sealed.
6. Fill in the outlined area using a figure eight motion. It is not necessary to go to the baseboards on each coat.
7. Allow 30-45 minutes to dry. Rule of Thumb: Do not recoat until finish or sealer is dry to the touch - plus 15 minutes.
8. After the first coat has been applied, to obtain the maximum gloss, burnishing the floor with a high-speed machine is recommended.
9. Dust mop area before applying next coat.
10. Reapply finish until desired appearance is achieved.
