COMMERCIAL COATINGS™

PRIMERS

Best options to start a project! Stain blockers, enamel undercoaters, and primers for walls and wood are available for interior and exterior use, and all of these primers can be topcoated with latex or alkyd paint.

CEILING PAINT

Premium paint that delivers a highly reflective flat finish in one coat. Fast drying, non-yellowing formula that is fade, spot and stain resistant. Can be applied to ceilings constructed of wall-board, plaster, wood, masonry, and metal.

DRY FALL

High hiding formulas available in a latex and an alkyd, the intense white coatings deliver 83% light reflectance and can be used on interior ceilings and walls. The alkyd falls dry in 8 feet and the latex in 10 feet, and both can be swept clean. Available in flat and semi-gloss finishes.

FLOOR PAINT

Tough, versatile enamels available in polyurethane and latex formulas. These long lasting paints produce an extra durable, smooth, hard finish that resists grease and oil contamination. For interior and exterior applications, including floors, doors, stairs, windows and trim, they can be applied to prepared metal, wood, or plastic.

BETTER QUALITY EXTERIOR LATEX PAINT

An excellent exterior latex paint. Recommended for application on a variety of surfaces, including aluminum, vinyl, wood, plywood, masonry and primed metal. Inhibits the growth of mildew and can be applied in temperatures as low as 35°F. Available in flat and gloss finishes.

GOOD QUALITY EXTERIOR LATEX PAINT

This mold-inhibitive paint can be applied to a variety of surfaces. Ideal applications include aluminum, vinyl, wood, plywood, masonry, and primed metal. Available in a flat finish.

INTERIOR/EXTERIOR LATEX ENAMEL

An easy-to-apply, good hiding finish. Delivers color uniformity and easy touch-up. This low odor paint is suitable for interior and exterior use and is available in a flat finish.
