

## FLOOR CARE **TOP SCRUBBING PROCEDURE**

### **Products:**

Sprayon® Tergent Force™ Blue, Scrubber King™, or Neutra Power™

### **Equipment:**

Wet floor signs  
Dust mop  
Broom and dust pan  
Putty knife  
2 mop buckets with wringers  
2 mop heads with handles  
Floor machine or auto scrubber  
Wet vacuum  
Scrubbing pad\*

\*Pad Suggestions:

**Red** - Light Soils

**Blue/Green** - Medium to Heavy Soils

### **Procedure:**

1. Sweep the floor of any large debris. Follow with dust mopping.
2. Using a putty knife remove any chewing gum prior that may be stuck to the floor.
3. Place "Wet Floor" signs throughout area (safety first).
4. Mix chemical according to label directions. Use cool to tepid water.
5. Liberally apply the cleaning solution to the floor. Under most conditions work within a 10' x 10' area.
6. Scrub the floor with a machine or auto scrubber.
7. Remove all slurry with auto scrubber, wet vac, or mop.
8. Rinse floor with clean water. Apply water liberally and pick up with a wet vac or auto scrubber.
9. After floor has completely dried, check for residue with your hand. If you find evidence of remaining film, rinse again.
