Sprayon in your own step-by-step for every cleaning need!
**Sprayon’s Daily Shop Guide**

**Stippling DIRECTIONS:**
1. Remove the furniture and equipment from area to be stripped.
2. Sweep the floor of any large debris; follow with dust mop. 
3. Using a putty knife remove any chewing gum prior to striping floor.
4. Place “Wet Floor” signs throughout the area to be finished/sealed. 
5. Outline area to be finished/sealed.
6. Fill in the outlined area using a figure eight motion. It is not necessary to go to the baseboards on each coat. 
7. Allow 30-45 minutes to dry.
8. To obtain the maximum gloss, burnishing the floor with a high speed machine is recommended after the first coat has been applied. 
9. To remove the stripping solution, use detergent with a mildly alkaline pH: • Detergent resistant 
• Slip resistant • Economical 
• 48% actives

**FINISHING AND SEALING DIRECTIONS:**
1. Dust mop the entire floor. 
2. Using a putty knife remove any chewing gum prior to striping floor.
3. Place “Wet Floor” signs throughout the area to be finished/sealed. 
4. Mix Sprayon® All Purpose Cleaner according to label directions. Use exclusively for hard floor coatings. Use caution on sealer to drink.
5. Press out excess; do not use wringer.
6. Liberally apply the stripping solution onto the floor. Under most floor conditions, the stripper will remove the finish. 
7. Allow the solution to stay on the floor for 5 to 10 minutes. 
8. Scrub the floor with machine or auto scrubber. 
9. To obtain the maximum gloss, burnishing the floor with a high speed machine is recommended. 
10. Remove the furniture and equipment from area to be finished/sealed. 
11. Place “Wet Floor” signs throughout the area to be finished/sealed. 
12. Fill in the outlined area using a figure eight motion. It is not necessary to go to the baseboards on each coat. 
13. Allow 30-45 minutes to dry.
14. To remove the stripping solution, use detergent with a mildly alkaline pH: • Detergent resistant 
• Slip resistant • Economical 
• 48% actives

**CAUTION:**
Do not allow the stripper to dry on the floor.

**NOTE:** Do not recoat until finish or sealer is dry to the touch - plus 15 minutes.

**FINISHES AND SEALING DIRECTIONS:**
1. Place “Wet Floor” signs throughout the area to be finished/sealed (safety first).
2. Mix the stripping solution following label directions. Always use caution on sealer to avoid damage.
3. Pour in finish-or sealer. Pour only what you intend to use. 
4. Pre-coated sealers must be sealed into the finish or sealer. Press out excess; do not use wringer.
5. Allow area to be finished/sealed to dry.
6. Fill the sealed area using a figure eight motion. It is not necessary to go to the baseboards on each coat. 
7. Allow 30-45 minutes to dry.
8. To remove a finish, use detergent with a mildly alkaline pH: • Detergent resistant 
• Slip resistant • Economical 
• 48% actives

**NOTE:** Do not recoat until finish or sealer is dry to the touch - plus 15 minutes.

**DARY MAINTENANCE Nuts & Bolts:**
- 1. Remove stripping solution following label directions. Always use caution on sealer to avoid damage.
- 2. Using a putty knife remove any chewing gum prior to striping floor.
- 3. Place “Wet Floor” signs throughout the area to be finished/sealed (safety first).
- 4. Mix Sprayon® All Purpose Cleaner according to label directions. Use exclusively for hard floor coatings. Use caution on sealer to drink.
- 5. Press out excess; do not use wringer.
- 6. Liberally apply the stripping solution onto the floor. Under most floor conditions, the stripper will remove the finish. 
- 7. Allow the solution to stay on the floor for 5 to 10 minutes. 
- 8. Scrub the floor with machine or auto scrubber. 
- 9. To obtain the maximum gloss, burnishing the floor with a high speed machine is recommended after the first coat has been applied. 
- 10. To remove the stripping solution, use detergent with a mildly alkaline pH: • Detergent resistant 
• Slip resistant • Economical 
• 48% actives
